

WHAT IS CLAIMED IS:

1. A transfer film comprising:
a base film,
5 a conducting film layer formed on said base film,
and
an adhesion layer formed on said conducting film
layer.

10 2. A transfer film comprising:
a base film,
a heat absorption film layer formed on said base
film,
a conducting film layer formed on said heat
15 absorption film layer, and
an adhesion layer formed on said conducting film
layer.

3. A method for fabricating a thin film for a
20 display apparatus panel, comprising the steps of:
disposing a transfer film on said display apparatus
panel, said transfer film being constructed by forming a
conducting film layer on a base film and an adhesion
layer on said conducting film layer, and
25 heating and pressing said transfer film onto said
display apparatus panel to transfer said conducting film
layer to said display apparatus panel.

4. A method for fabricating a thin film for a
30 display apparatus panel, comprising the steps of:
disposing a transfer film on said display apparatus

panel, said transfer film being constructed by forming a heat absorption film layer on a base film, a conducting film layer on said heat absorption film layer, and an adhesion layer on said conducting film layer, and

5 heating and pressing said transfer film onto said display apparatus panel to transfer said heat absorption film layer and said conducting film layer to said display apparatus panel.

10 5. A display apparatus comprising:

a conducting film fabricated by transferring from a transfer film comprising a base film, a conducting film layer formed on said base film layer, and an adhesion layer formed on said conducting film layer.

15

6. A display apparatus comprising:

a conducting film and a heat absorption film fabricated by transferring from a transfer film comprising a base film, a heat absorption film layer formed on said base film, a conducting film layer formed on said heat absorption film layer, and an adhesion layer formed on said conducting film layer.

20

7. A method for fabricating a film for a display apparatus panel, comprising the steps of:

25

disposing a transfer film on said display apparatus panel, said transfer film having said film to be attached on said display apparatus panel, and

heating and pressing said transfer film onto said display apparatus panel.
